PROFILE SUMMARY

Final-year Netcentric Computing student specializing in mobile app development. Hands-on experience building a functional e-marketplace (UMart) and a GPS tracking app using Flutter and Firebase. Combining a strong technical foundation (3.71 CGPA) with practical problem-solving skills and version control management (GitHub). Seeking a 14-week internship in all Malaysia starting 7 September 2026 until 11 December 2026 to contribute to scalable mobile and web solutions.

EDUCATION

Bachelor of Science (Hons.) Netcentric Computing (Current CGPA:3.71) **Jul 2023 - Present**

Universiti Teknologi MARA (UiTM) Cawangan Perlis

- Key Coursework: Mobile Application Development, Web Development, Digital Forensics, Network Design and Analysis.

Foundation in Physical Science (CGPA: 3.49) **Jul 2022 - May 2023**

Penang Matriculation College

- Key Coursework: Computer Science Concepts, Java Programming.
- MUET: Band 4

ACADEMIC & TECHNICAL PROJECT

Lead Developer | UMart: A Smart E-Marketplace Mobile Application

- Designed and developed an interactive e-marketplace application specifically tailored for UiTM students.
- Integrated Flutter for the frontend UI/UX and Firebase for the backend database to ensure real-time data syncing and efficient tracking.

Mobile Developer | Crowdsourcing & GPS Tracking App

- Collaborated to develop a mobile application featuring crowdsourcing capabilities and centralized server integration.
- Implemented real-time GPS tracking, interactive maps (MapActivity), and upgraded the Admin Dashboard UI using Glassmorphism.
- Managed project versions and code integration actively utilizing GitHub (22+ commits).

Frontend Developer | AI Image Generator Web App (Ongoing)

- Designed and developed a fully responsive interface featuring dynamic CSS state management and persistent dark mode using HTML5, CSS3, and Vanilla JavaScript.
- Integrated the Hugging Face REST API via asynchronous fetch requests to generate custom images dynamically based on user prompts.
- Deployed the live application on Vercel, utilizing cloud environment variables and serverless functions to manage API token securely.

PROFESSIONAL EXPERIENCE

ProductionTechnician (Contract) | KOBELCO PRECISION TECHNOLOGY SDN.BHD. (Penang)

Aug 2024 - Sep 2024

- Ensured smooth manufacturing processes and maintained strict adherence to company Standard Operating Procedures (SOPs).
- Collaborated with team members to meet daily production targets efficiently.

Operations Specialist (Contract) | Lumileds (Penang)

Jun 2023 - Sep 2023

- Supported daily operational tasks and maintained quality control in a fast-paced environment.
- Demonstrated strong problem-solving skills and adaptability in cross-functional teams.

Cashier | Watikah Ilham Sdn. Bhd. (Penang)

Apr 2022 - Jul 2022

- Managed daily financial transactions and performed accurate data entry tasks.
- Provided excellent customer service and handled customer inquiries professionally.

ACTIVITIES AND INVOLVEMENT

- Delegate - Cultural Orientation Malaysia-Indonesia Program 2025
 - Participant - International Competitive Programming and Multimedia Competition
 - Participant - Computer Science Symposium, Penang Matriculation
- Sep 2025
- Sep 2025
- 2023

SKILLS

- **Proficient:** Flutter, Dart, Firebase, GitHub.
- **Familiar:** PHP, Laravel, HTML, CSS, Java, Vanilla JavaScript, Rest API Integration.
- **Soft Skills:** Adaptability, Cross-cultural Communication, Teamwork, Problem-Solving.
- **Language:** Bahasa Melayu (Native), English (Intermediate).
